

Strategy

SLOMAN is a manufacturer in pumps and pump technologies that enable utility and industry customers to improve performance while lowering environmental impact.

With our technology, global presence, application knowledge and local expertise, we offer products, solutions and services that allow our customers to improve their operations – whether they need to increase the reliability of a pump grid or raise productivity in a factory.

Focusing on our core strengths in pump and pump technologies, we strive for organic profitable growth. Our manufacturing base ensures consistent top-quality products – for customers around the world. Our customers have broad and easy access to SLOMAN’s offerings - whether they buy from us directly or through distributors, wholesalers or other partners.

At SLOMAN, our mission spells out our unique contributions, and shows us how we can achieve our ambitions. Our vision is a fuller description of our desired state - of what kind of company we want to be.

We help our customers to use pump power effectively and to increase industrial productivity in a sustainable way. SLOMAN delivers profitable growth by providing pumps and pump technologies to customers throughout the world. We help them to improve their performance and productivity as well as to save energy and lower environmental impact.

SLOMAN’s technology competence, broad application know-how and global presence offer customers easy access to pump engineering and industry solutions. Innovation, development and quality are key characteristics of our product and service offering. We build on long-lasting, value-creating partnerships with customers and suppliers.

As dynamic company, SLOMAN is recognized as the company in terms of market impact, growth and profitability, value creation, sustainability and ethical behavior.
